WE STAND FOR PERFORMANCE AND PASSION

YOUR GLOBAL PARTNER FOR ACCESS TECHNOLOGY

As inventor of the aluminum ladder in Europe over 50 years ago, Hailo introduced the professional ladder systems into the wind turbines. So Hailo was there right from the start! Today, Hailo Wind Systems is one of the world's market and technology leaders for safe and reliable access and climbing solutions.

With our premium ladder systems, customised service lifts, state-of-the-art fall arresters, smart climb assist systems, efficient movable platforms and much more, we provide everything for professional access systems in wind turbines – and other industries.

Along with our comprehensive range of services, our international GWOcertified training center Safety And Rescue Academy (S.A.R.A.) sets the standard for safety training and education in many industries with its fully-equipped training tower, video tutorials and e-learning. With own subsidiaries and service centers on 4 continents, we provide our customers locally produced professional products, excellently trained contact persons and service technicians worldwide.

We are proud of our passionate contribution to sustainable energy generation and increased safety in wind turbines. And you can feel this enthusiasm in every one of our projects.

PRODUCTS

ACCESS TECHNOLOGY MEETS HIGHEST STANDARDS

With its decades of experience, Hailo Wind Systems has a comprehensive range of professional products and system solutions. Service lifts, ladder and fall arrest systems, climb assists, movable platforms, tower equipment and much more: Our product portfolio always offers the very best quality – for safe and reliable access technology in wind turbines.

Working closely together with global players and leading specialists in the wind energy sector, we are continuously investing in the development of new products and technologies. With this sustainable strategic approach, we are one of the leading suppliers for ladders, fall arrest systems and service lifts. Worldwide.

**Safety, reliability
and quality always
come first.**

*Dennis Wittemann
(Head of Quality
Management)*

Service lifts

We develop service lifts precisely customized to your requirements. Thanks to our comprehensive expertise, all our ladder- and rope-guided service lifts are characterized by their reliability, quality, smart design and low life-cycle costs.

Ladders and Fall Arrest Systems

High quality rungs with patented beading and a special anti-slide profile ensure that the quality of our ladders is well-known worldwide. Our rail- and rope-based fall arrest systems offer maximum safety and are also available pre-assembled.

Climb Assists and Access Platforms

Our innovative climb assists and our movable platform are the smart alternative to service lifts and are also ideally suited to retrofit projects. Enjoy the advantages of our brandnew solutions and rediscover climbing technology.

SERVICES

EXPERTISE AND KNOW-HOW FROM THE SPECIALISTS

Reliable partners with high-quality and cost-efficient top services are essential for long-term success. Our decades of experience in the development, installation and maintenance of innovative products to consistently high quality standards symbolizes our expertise in the service industry. And thanks to our excellently qualified service technicians in subsidiaries on

4 continents and a strong global network, we are always on-site fast. With our fully equipped service buses, we can efficiently perform repairs and maintenance directly on-site, ensuring quick and cost-effective solutions. We provide all services for both onshore and offshore operations, as well as for retrofit projects and maintenance contracts.

★ YOUR SERVICE BENEFITS

- ✓ Automatic annual maintenance (optional)
- ✓ 24-hour service for damage (optional)
- ✓ Only one generator shutdown annually
- ✓ Annual service report
- ✓ Services with manufacturer know-how
- ✓ Favourable complete services
- ✓ On- & offshore
- ✓ Favorable full service offers

Installation & Inspection

We install and support our products worldwide. With our extensive manufacturer know-how and our strong global service network, we are there for you at any time – especially when you need fast and uncomplicated support.

Maintenance & Repair

We maintain and repair service lifts, ladders and fall arrest systems and much more with manufacturer know-how. This also includes annual maintenance of DUALlift and Tractel Greifzug components as well as DUALlift general overhaul incl. low-cost ring replacements.

Special Solutions & Expert Inspections

We provide you expert inspections of PPE, rescue equipment, first aid kits, machine and deck cranes as well as for the entire ladder and fall arrest system. And of course, as with all other services, we can provide these onshore, offshore and as part of retrofit projects.

★ YOUR E-LEARNING BENEFITS

- ✓ Worldwide available at any time
- ✓ Tablet and Smartphone optimized
- ✓ Fast and short-term training
- ✓ Experience from 40.000 active accounts and 69.000 certificates
- ✓ Instant e-certificates

GWO TRAINING:
98 %
SATISFACTION*

* In 2023

Wind Turbines

Our GWO-certified Safety And Rescue Academy (S.A.R.A.) provides safety training especially for the wind industry like assemblies, maintenances, rescues, first aid, expert inspections, TSL and much more. We are there for you worldwide, always according to international standards.

Rescue, First Aid and PPE

In addition to our 15-meter high training tower, we offer a number of professional rescue, first aid and PPE training courses – always with experienced trainers from sectors such as fire department, rope rescue or emergency rescue services.

Industry, Municipalities and Trade

We offer a wide range of theoretical and practical training in all areas, including industrial fire protection, high-bay warehousing, climbing and ladder technology, firefighting, and confined space work and rescue (shafts, manholes etc.).

TRAINING

EVERYTHING FROM A SINGLE PARTNER

The Safety and Rescue Academy (S.A.R.A.) from Hailo Wind Systems has been successfully organizing cross-industry training courses in realistic working environments for many years. All training courses are conducted by experienced trainers with extensive expertise from areas such as industry, fire brigade, and/or rescue service.

In addition to wind turbine manufacturers, service companies, maintenance services, operating companies, and occupational health and safety officers from various industries, participants from the BOS (authorities and organizations with safety functions) also benefit from extensive practical and theoretical training opportunities.

All safety training courses provided by Hailo Wind Systems comply with international standards and regulations, as well as the current guidelines of accident insurers and professional associations. The Safety and Rescue Academy is also approved by the Global Wind Organisation (GWO) and the DGUV.

TEAMWORK IS MORE THAN JUST A WORD

HOW WE WORK

True excellence is only possible in a team with great collaboration. Thus, every employee makes a sustained contribution to shape the future positively by doing the best for themselves, their colleagues and the company.

With a positive atmosphere that supports personal selfimprovement and continuous improvement in all processes, we develop and ensure new ideas to actively shape the future and perfect the safety of access solutions.

*Our team
makes the difference!
That is why we only use
pictures of our own
employees in all media.*

(International Marketing)*

WHY YOU CAN ALWAYS RELY ON US

OUR VALUES

QUALITY

We ensure safety and productivity
in wind turbines.

SAFETY

We have excellent solutions for
your individual needs.

RELIABILITY

We can always offer you the best and
highest-quality products and services.

PASSION

We are committed and deeply
associated to wind power.

HAILO WIND SYSTEMS

TOGETHER FOR A **SAFE FUTURE.**

Few industries in the world experience as much change as the wind energy industry. Therefore, reliable partners with high-quality products and excellent services are absolutely essential. That is why quality, reliability and safety will continue to be our top priorities.
