

Mobile work platform

Innovative. Safe. Efficient.

Expand your **maintenance and service** options in wind turbines! For example, for inspections on ladders, interior work, repairs, or work on the crossbeam. The platform can be quickly mounted on service lifts **without tools** - for flexible, safe, and location-independent use. The two-hand operation ensures safe upward and downward movement, while the **generous work surface** provides sufficient space for free and safe working. And best of all: no adjustment of the platform cutout is necessary.

Unique!

For jobs that were
previously impossible!

INNOVATIVE

Makes maintenance and servicing easier

SAFE

Comprehensive safety features
for reliable occupational safety

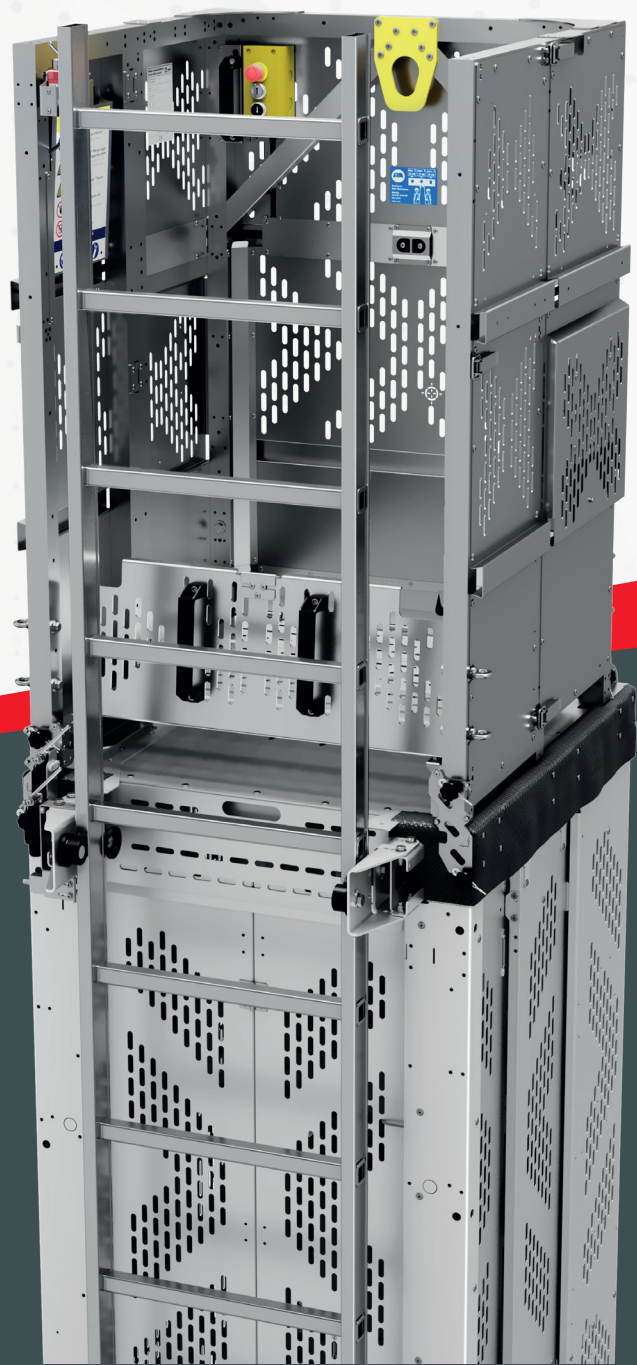

EFFICIENT

Quick to install without tools,
flexible to use
